Company Overview

Ambaa Tech brings a deep understanding of the unique needs of federal, state, and local agencies, with a focus on:

- Cybersecurity and risk mitigation. Compliance with NIST, FedRAMP, HIPAA, and other regulatory frameworks
- Scalable solutions that prioritize cost-efficiency, transparency, and stakeholder collaboration

Experience supporting healthcare, infrastructure, public safety, economic development, hospitality, construction, logistics and IT modernization

Core Competencies

Fractional CIO/CTO/CDO Services - Providing experienced executive leadership to guide agencies through modernization, digital strategy development, and IT governance—without long-term overhead.

Digital Transformation & Modernization - Expertise in cloud migration, DevOps adoption, infrastructure upgrades, and process automation to improve efficiency and service delivery across government operations.

Data Management & Analytics

Secure and compliant solutions for managing sensitive data, enabling better decision-making, reporting, and performance tracking in line with federal and state data governance requirements.

Software Integration & Application Development

Full lifecycle development and support for enterprise applications—custom or COTS—including Salesforce, Oracle, Microsoft, and AWS platforms. Capabilities include implementation, customization, and ongoing support.

Workforce & Talent Solutions

Specialized in recruiting and retaining cleared and qualified personnel across technical disciplines. Services include staff augmentation, surge support, and cultural alignment to agency missions.

Differentiators

- **AI-Driven Innovation.** We harness the power of **AI, automation, and emerging technologies** to deliver smarter, faster, and future-ready solutions.
- **Holistic Partnership.** Beyond just technology, we bring 25+ years of expertise in **strategy, data, software, staffing, and governance**, positioning ourselves as a true transformation partner.
- **Trusted for Complex Projects.** From **startups to corporates to government subcontracting**, our proven ability to balance **speed, scalability, and compliance** makes us the partner orgs can rely on.

Past Performance

UCF/Florida High Tech Corridor: Business transformation, IT Planning and Strategy, Process improvement, Software development, cloud infrastructure and Technology support.
